

Your benefits at a glance:

1 External handle

The handle is located behind the clamp's rail. This is specially conceived to allow the clamping and spreading of workpieces which are not easily accessible.

2 Special V-grooved pressure plate

This sturdy pressure plate is made from high-grade cast iron, and can be tilted by up to 30°. The prism is ideal for spreading round or angular workpieces.

3 Removable end stop

The end stop can be removed – to allow the sliding arm to be quickly turned around for spreading.

4 Extremely sturdy

Fixed bracket and pressure plate are produced and tempered from a single piece, thus very torsion-resistant. This guarantees you maximum tensile strength and sturdiness.

Claw clamp GRA

Nº	← a → mm	← b → mm	← x → mm	⚖️ kg	📦 qty.	VB0002

GRD	0,70	1	

- Clamping an spreading force up to 8,000 N
- Externally-positioned spindle, protected from welding spatter
- Clear access to work area

- Spreading from the inside outwards
- Flat jaw face
- V-groove for clamping round and oval workpieces
