

Leica DISTO™ A6

The communicative one for in-/outdoors

Bluetooth® data transfer - for a reliable transfer of measured values

The measuring process on the Leica DISTO™ A6 isn't over with the display of the results: integrated BLUETOOTH® technology, combined with software designed to let you export measurement readings straight into various programs (e.g. Word®, Excel®, AutoCad®) without the use of cables. Take the hard work out of measuring – it is fun now!

Wireless transfer via Bluetooth®

Forget paper and pencil now!

DISTO™ transfer

Transmits your measured values without wires to your Pocket PC or laptop for further processing - with the program of your choice. The application operates in the background, so will not even notice it running.

Features	Your advantages
Measuring range of 0.05 up to 200m (0.16 up to 650ft); typ. accuracy $\pm 1.5 \text{ mm}$ ($\pm 0.06 \text{ in}$)	Fast and accurate measurement of short and long distances
Power Range Technology™	Allows measuring of long distances (approx. 100m) without target plate
Integrated viewfinder with 2x magnification	Indispensable for measurements outside esp. at bright sun lights
Integrated BLUETOOTH® technology	Wireless and reliable data transfer to Pocket PCs and PCs
DISTO™ transfer	Free software which sends the measured values reliably to Excel®, Word®, AutoCad® and many other softwares.
Navigation keys	Direct control of the cursor movements
IP54	Splash and dust proof - important for all professionals
