MAGTAP

SPECIALIST
CUTTERS

ARBORS and
ACCESSORIES

The MagTap features a special high torque, electronically controlled reversing motor unit and tapping adapter which permit the fast and accurate drilling and tapping of holes up to 32mm diameter.

In addition to the standard cutter range, cutters for special purposes and in special sizes, materials and finishes such as ceramic or TiN (titanium nitride), are available to special order.

We will also be pleased to develop bespoke solutions to your particular cutting problems, please call our experienced technical department for advice.

There is a wide range of accessories for Magtron machines - chucks, arbors, adaptors and lubrication systems, both integral and external, for maximum versatility in fabrication shops or out on site.
